this readable and informative survey of key ideas about students thinking in science builds a bridge between theory and practice by offering clear accounts from research and showing how they relate to actual examples of students talking about widely taught science topics focused on secondary students and drawing on perspectives found in the international research literature the goal is not to offer a comprehensive account of the vast literature but rather to provide an overview of the current state of the field suitable for those who need an understanding of core thinking about learners ideas in science including science education students in teacher preparation and higher degree programs and classroom teachers especially those working with middle school high school or college level students such understanding can inform and enrich science teaching in ways which are more satisfying for teachers less confusing and frustrating for learners and so ultimately can lead to both greater scientific literacy and more positive attitudes to science

abstract this book explores the factors that influence the acceptance or rejection of the big bang theory and the theory of biological evolution the rejection of either theory can occur despite the time that has elapsed since the original theories were proposed and their wider acceptance the study critically examines the biographies of individuals establishing the factors that influence their rejection or acceptance of either theory the book concludes that individuals are affected by multiple factors and explores how these findings may contradict other studies which identify religious belief as the driver for rejection the author proposes an original theory of opinion formation that is specific to both scientific theories and suggests the use of inclusive teaching methods and historical narrative within science lessons which may assist in explaining to students the story of discovery of each scientific theory as well as teaching the theory itself the study also concludes that the rejection of both theories particularly by older participants may be linked to past discredited theories including the steady state theory and the theory of panspermia
